

HERE WE GO ...  
IT'S SOFTWARE!

 **CERTIFIED FOR**  
MICROSOFT PHONE  
SYSTEM DIRECT ROUTING

# ANYNODE® SBC & MICROSOFT TEAMS DIRECT ROUTING

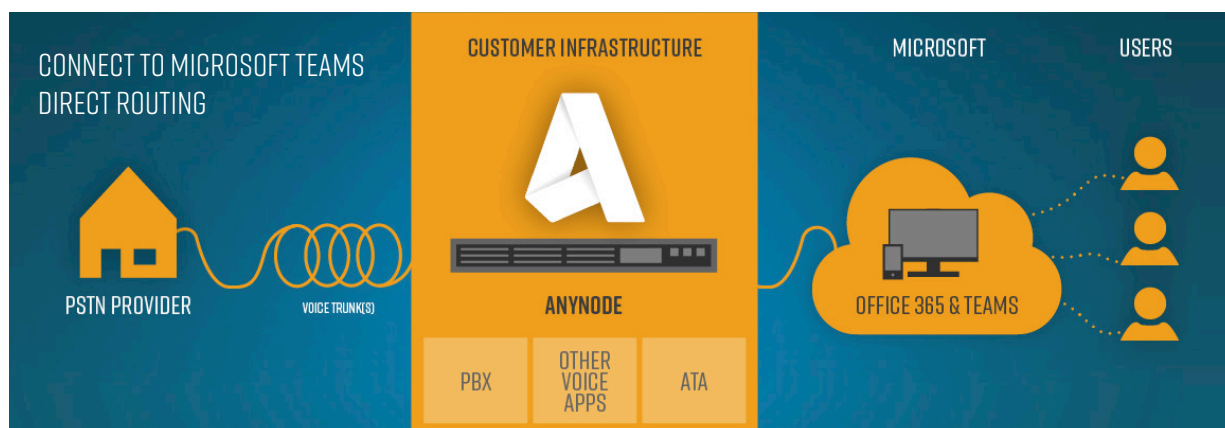

#ANYNODESBC **THE SOFTWARE SBC**

## LET'S CONNECT – IT'S SOFTWARE!

Starting end of June 2018 Microsoft Phone System Direct Routing is now generally available. Direct Routing allows you to connect to Microsoft Cloud using nothing more than a SIP trunk and an SBC. For customers who have to manage the infrastructure like an existing PBX or Voice Services on-premises this will be their optimal choice.

**Our product anynode® is a Session Border Controller that is entirely a software based solution. It works as an interface for any number of SIP UAs i.e.; SIP phones, SIP PBXs, and also SIP providers. It converts port and directory information, provides security, routes session traffic and manipulates call numbers.**

Let's connect to Microsoft Cloud using nothing more than a SIP Trunk and an SBC.

### VERSATILE

With Microsoft Phone System Direct Routing and **anynode®** you are able to connect to almost any telephony trunk or interconnect with third-party PBX equipment.

### AFFORDABLE

**anynode®** can be collocated on existing hardware investments like your datacenter. Look for **anynode®** on Azure and AWS Marketplace if you prefer the cloud deployment.

### EASY

**anynode®** configuration wizard makes the installation a piece of cake. Just a few steps to connect your SIP provider with Teams. Of course it works with Microsoft Skype for Business as well!

### INSTANTLY AVAILABLE

Ready for dispatch and only a second away: Installation files are available for download in our community and licenses will be delivered within minutes by e-mail. Get started right away!

# THE BENEFITS OF DIRECT ROUTING

With Direct Routing, you can connect anynode® to almost any telephony trunk or interconnect with third-party PBX equipment.

For the detailed steps on how to deploy and configure anynode®, please refer to the TechNote in our Community anynode® – Microsoft Teams with Direct Routing.

## CONNECTION TO LEGACY PBX, SIP PROVIDER AND OTHER DEVICES

A list of predefined templates for easy configuration:

<https://community.te-systems.de/community-download/files?fileId=1783>

This list includes all major PBX vendors and providers like Avaya, Cisco, Mitel or Unify and is updated every month.

## LOCAL PSTN CONNECTIVITY TO MY PREFERRED PROVIDER

Keep your phone numbers and plans without changing your provider. Porting your phone number to a new provider can end up in a crisis.

## MINIMAL INVESTMENT

It could be collocated on existing hardware investments like your datacenter. **anynode®** is also available on Azure and AWS marketplace.

## START YOUR FREE 2 MONTH TRIAL NOW!

Get a **full featured SBC license** including access to all resources and support. **All FREE for 2 months. You'll enjoy:**

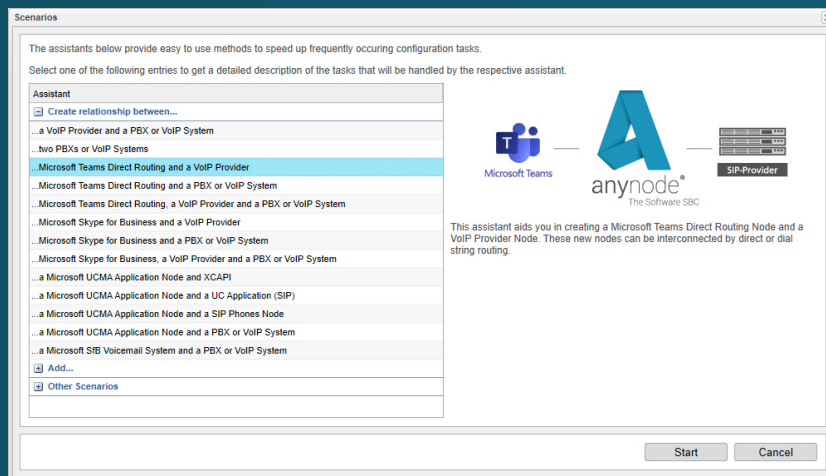

- **10 Sessions** license for 10 concurrent calls
- **Configuration wizard** for Microsoft Teams, PBXs and providers
- **Free support** by phone and e-mail
- Access to our **online documentation**

## THIS IS WHERE THE MAGIC HAPPENS

**anynode®** is a pure software solution which offers, apart from simple quick access to the user interface, many advantages in comparison to basic hardware solutions. In addition the installation on Microsoft Windows platform reduces the administration expense.
